# Welcome to Russell Air

Russell Air provide the full range of air conditioning and mechanical services solutions. From system design right through to installation, commissioning and maintenance our team have wide experience across the commercial, industrial, government, and infrastructure sectors throughout Queensland.

We have successfully delivered projects for retail precincts, offices, education facilities, airports and hotels, health and aged care, hotels & clubs, and more.

We're proud of the long-term relationships we've built over the years with our commercial clients. Our attention to detail, comprehensive service offering, and outstanding customer service have helped us build a reputation for reliability and adaptability.

Using only quality brands and materials that meet Australian Standards.

## Our Vision

We aspire to help our commercial clients by supplying, installing and maintaining quality, energy efficient air conditioning and mechanical services. Our friendly, professional team work to satisfy their air conditioning needs so that they are happy, cool and comfortable.

# The Russell Air difference

As a modern air conditioning and mechanical services company, we stay up-to-date with the latest technological innovations – not just in air conditioning but in all industries. In this way, we constantly seek to adapt new technology and processes to improve the way we work.

We have assembled an expert team whose knowledge and skills are matched by their can-do outlook and approachability.

They bring decades of experience to their roles – yet they're flexible enough to adapt to and overcome the challenges which are inevitable on any large project.

Whether you need commercial air conditioning installation or replacement, the Russell Air team work with you to get your project completed on time, on budget, and with minimal disruption.

---

## THE COMPLETE RANGE OF COMMERCIAL AIR CONDITIONING AND MECHANICAL SERVICES

---

The Russell Air team are experts in working successfully with builders from all tiers. We understand your need for value and quality throughout the build process. We bring our experience to plan your job with the detail required to deliver an outstanding result.

On complex commercial projects, our innovative thinking allows us to implement simple, effective solutions that work.

Importantly, we provide the entire range of commercial air conditioning and mechanical services you require, from design and supply to construction and installation, right through to commercial air conditioning maintenance. By working with us as your sole air conditioning partner, you benefit from our accountability, experience, and expertise.

## What We're Known For

The Russell Air team understand the needs of the construction industry. We provide comprehensive air conditioning and mechanical solutions for builders and commercial projects, and we're happy to lend our expertise to help design the ideal air conditioning system for your new building.

We are highly experienced in installing air conditioning systems into buildings during the construction process. This may require the co-ordination of several stages of work such as the roughing in, fitting off, and the final commissioning.

Along with installing commercial air conditioning at established commercial properties, we are equally adept at providing air conditioning maintenance and service for your commercial property, to ensure that the system is always running efficiently.

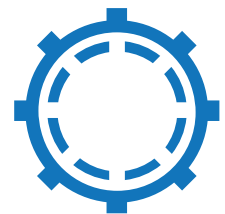

# Our Core Values

WHEN YOU CHOOSE TO PARTNER WITH RUSSELL AIR FOR YOUR PROJECT, YOU'LL SEE WHY WE ARE RECOGNISED FOR OUR:

## Integrity

From our director to our apprentices, our team hold themselves to the highest standards of professionalism, respect, and integrity.

## Reliability

We respect your need for a reliable, accountable service at all times. We deliver this through transparent communication, expert advice, and a flexible approach to getting the job done.

## Safety

All our team are committed to safety in the workplace. We work to Australian Standards at all times to ensure the safety of our employees, our clients, and their assets. We hold all relevant licences and insurances.

## Teamwork

We're firm believers that by working together we can achieve so much more than we could individually. Teamwork leads to better results for our clients and higher job satisfaction for our staff.

## Approachability

We select our team for their approachability and adaptability. All our employees have the flexibility to adapt to the changing conditions which can easily occur when working in a commercial environment.

# Our Team

We are proud to be a family owned and operated company.

Our director [Mitch Russell](#) has more than 15 years' experience in the air conditioning and mechanical services industry, and plays a critical role in assembling and maintaining our dedicated team.

For us, teamwork is more than a word. It's a vital part of the way we ensure an outstanding result when working on commercial projects.

Our teamwork-first ethos leads to better outcomes and higher job satisfaction, ensuring we can retain the best employees who work together seamlessly.

Our team share our commitment to safety and sustainability, believing these are non-negotiables when delivering the type of results we are known for.

We are highly experienced in working with builders. Our team understand the construction process, and we tailor our work methods to provide a seamless, reliable service. Our team work with integrity, respect, and professionalism at all times.

Challenges and changing conditions are a fundamental part of working on large commercial projects. Our team face challenges with a smile, working with flexibility and adaptability to deliver the best result, while never compromising on our core values.

---

# Innovation And The Future

We're proud to be an innovative, technology-driven company. We stay abreast of the latest developments in our industry, believing that this gives us the edge in adapting and improving our service and processes for a better client experience.

The air conditioning and mechanical services industry is ever-evolving, and we adapt our ways of working to ensure we're up-to-date with the latest advances. We utilise best practice procedures and highly automated systems to drive our business. We believe this produces great outcomes for our clients, our team, and our owners.

Safety is a non-negotiable. We work to Australian Standards at all times, and ensure the safety of our employees,

our clients, and their assets. We hold all relevant licences and insurances. We work with sustainability in mind, recognising that this principle is a key driver of our business well into the future. We utilise energy saving systems wherever possible.

Recognising that air conditioner usage worldwide is a key driver of climate change, we actively seek to use green, low-emissions technology wherever possible. This new technology also aims to reduce maintenance costs, water usage, and of course energy intensity.

Our expert air conditioning professionals are licensed and certified to safely handle potentially dangerous greenhouse gases that can be found in commercial air-conditioners.
